## Connecting with Consumers and Carers

The CALHN Mental Health Clinical Program is committed to consumer and carer engagement and consultation throughout the OPMHS Redesign. It is an opportunity for anyone with consumer or carer experience of this service to get involved and provide views and feedback on:

- care and treatment that guides older persons mental health services
- the ideal service – how would it work?
- service description – what works well and what we could do better?

The redesign is in the first of three phases, aimed at defining core business and developing an OPMHS model of care.
